Description of the program

International Week for students “Boosting Digital Skills in Education and Business” provides students with a multidisciplinary understanding of digital skills in education and business and combines theoretical knowledge with practical skills. The main goal of this program is to teach students how integrate digital skills into business and education, focusing on preparing students for a digital work environment.

This program aims to equip participants with a comprehensive understanding of the challenges and solutions related to the questions and topics:

- Digital Skills: What They Are and How to Improve Yours?
- How Digital skills can help you in education and your career?
- Digital skills for critical and secure use of IT for work, leisure and communication.
- Digital Skills - Challenges and Strategies in Higher Education, Lifelong Learning...
- Student Experiences with Digital Technology.
- Core and Advance Digital Skills.
- Artificial intelligence in education and business.

Official working language: English
